EDUCATION

University of Toronto

September 2024 – Present

Pursuing Honours Bachelor of Science (HBSoc), Math and Physical Sciences Admission Stream.

Philip Pocock Secondary School

September 2020 – June 2024

OSSD, Ontario Scholar Recognition, Proficiencies in all CS-related courses.

EXPERIENCE

UofT Robotics for Space Exploration, CANSAT Subteam

September 2024 – Present

- Developed on-board camera system to record high quality redundant video during launch and parachute deployment in a heavily power- and performance-constrained environment.
- Was solely responsible for parachute selection, involving CAD modeling and CFD simulations of various parachute sizes and shapes to select one that would slow the CANSAT down to the precise speed required by the mission parameters.
- Solely designed and built QHA ground station antenna and worked with team members to optimize the design using Ansys HFSS simulations.
- Secured a software license sponsorship equivalent to \$50,000 in value
- Designed subteam mission patch and am in the process of redesigning the website and logo

UofT SDSS Datathon

March 2025

- Lead a team and developed a MVP web app to forecast the probability and predicted length of TTC subway delays

STA130 Research Project

December 2024

- Developed a OLS regression model and used p-value analysis to determine if playing online video games during periods of social isolation have a positive correlation with mental health

Harmonic Music Match (Side Project)

September 2023 – 2024

- Solely developed and designed a web app that would match registered Spotify users based on the similarity of their listening activity
- Developed using HTML/CSS/JS with Node.js, Express, and jQuery. Used MySQL for user info and a vector database (Milvus) to store songs as embeddings in latent space. Hosted on an AWS EC2 machine with nginx.

SKILLS

Languages and Frameworks: Java, SwiftUI, Swift, HTML, CSS, Javascript, Python, MySQL, LaTeX, Tailwind, Svelte, Express.js

Software Tools: Jupyter Notebooks, Git, Xcode, PyCharm, VS Code, PlatformIO

LEADERSHIP AND ACTIVITIES

RSX Seek JR. Volunteer, Software Advisor

November 2024

- Assisted high school teams tasked with building a mini moon rover with Arduino and ECE troubleshooting questions.

High School STEM Club, Founder and President

September 2023 – June 2024

- Founded and led the STEM club, focusing in 3D printing, CAD, and coding projects/events
- Collaborated across multiple school administration changes to procure a 3D printer and certify a local vendor for 3D printing purchases.

High School Broadcast Club, Lead Producer, Anchor, and Mentor

May 2022 – June 2024

- Lead the broadcast club to deliver a smooth and professional school news broadcast every morning; worked in the tech positions and live anchor positions an equal amount.

Student Senate Representative, DPCDSB

September 2022 – June 2023

- Represented my school on the board level, voiced general concerns, and consulted on board policies and initiatives.

COMPETITIONS

2024 CEMC Euclid Mathematics Competition, 2024 CEMC Canadian Computing Competition, 2024 OBA-OJEN Mock Trial Tournament, 2023 DPCDSB Game Development Competition, 2023 Apple Swift Student Challenge, 2023 CEMC Hypatia Mathematics Competition, 2023 CEMC Hypatia Mathematics Competition, 2023 CEMC Hypatia Mathematics Competition, 2023 OBA-OJEN Mock Trial Tournament (semi-finalist), 2023 CEMC Canadian Computing Competition
